

Diabetic Shoes

Diabetic shoes is a great benefit to individuals who have diabetes. They provide comfort, protection and even help reduce pain to the feet. The best part about diabetic shoes is they could come at **NO COST** to you or your patients if approved by insurance. Most insurances will allow **1 pair of diabetic shoes and 3 pairs of shoe inserts** that are customized to your feet on an annual basis. Any diabetic patient would be eligible to receive diabetic shoes if they have one of the following conditions related to their feet:

- *History of partial or complete amputation of the foot*
- *History of previous foot ulceration*
- *History of pre-ulcerative callus*
- *Peripheral neuropathy with evidence of callus formation,*
- *Foot deformity*
- *Poor circulation*

How to get started

- **First**, identify the patients that are diabetic and whom may qualify.
- **Second**, use the provided fax cover form to list all your patients whom you would like us to evaluate.
- **And Last**, Fax over the provided fax cover form and demographics for each patient being evaluated

Who we are

We are Oklahoma Pedorthic Lab. We have over 20 years of experience in providing patients across Oklahoma and Texas with solutions to their diabetic foot needs. We provide shoes and custom inserts, from the leading manufactures in diabetic footwear. We use the latest in 3D technology to perform scans on patient's feet in order to provide a custom insert that is perfect for their feet.

What happens next

After you fax to us the list of patients you would like us to evaluate, the following will take place:

- A member from Oklahoma Pedorthic Lab will contact you shortly after receiving your information.
- We will then assign you a documentation coach, who will help coach you on what documentation is needed for insurance purposes.
- After all documentation is collected, we will then come to your facility and perform a thorough foot evaluation on each patient's feet. We also will help the patient choose which shoes would be the best fit for them.
- After all shoes are custom built, we will return to your facility to delivery the shoes and will ensure that all shoes properly fit.
